Allowable Subject Matter

Claims 18-41 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims 18, 25 and 35 recite identifying, separating and redirecting measurement data request instructions in an incoming data stream to bypass the internal interfacing unit. This feature, in combination with remaining claimed structure overcomes the prior art of record. U.S. Patent Application Publication 2001/0001540 to Okamuro et al discloses a similar position measurement methods and apparatus; however, the identifying, separating, and redirecting request instructions is not disclosed. Okamuro requests data by using a separate output circuit. Therefore, the signal does not need to be separated.

The reason for allowance of claim 34 is as stated in the Office Action dated 212-29-2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
